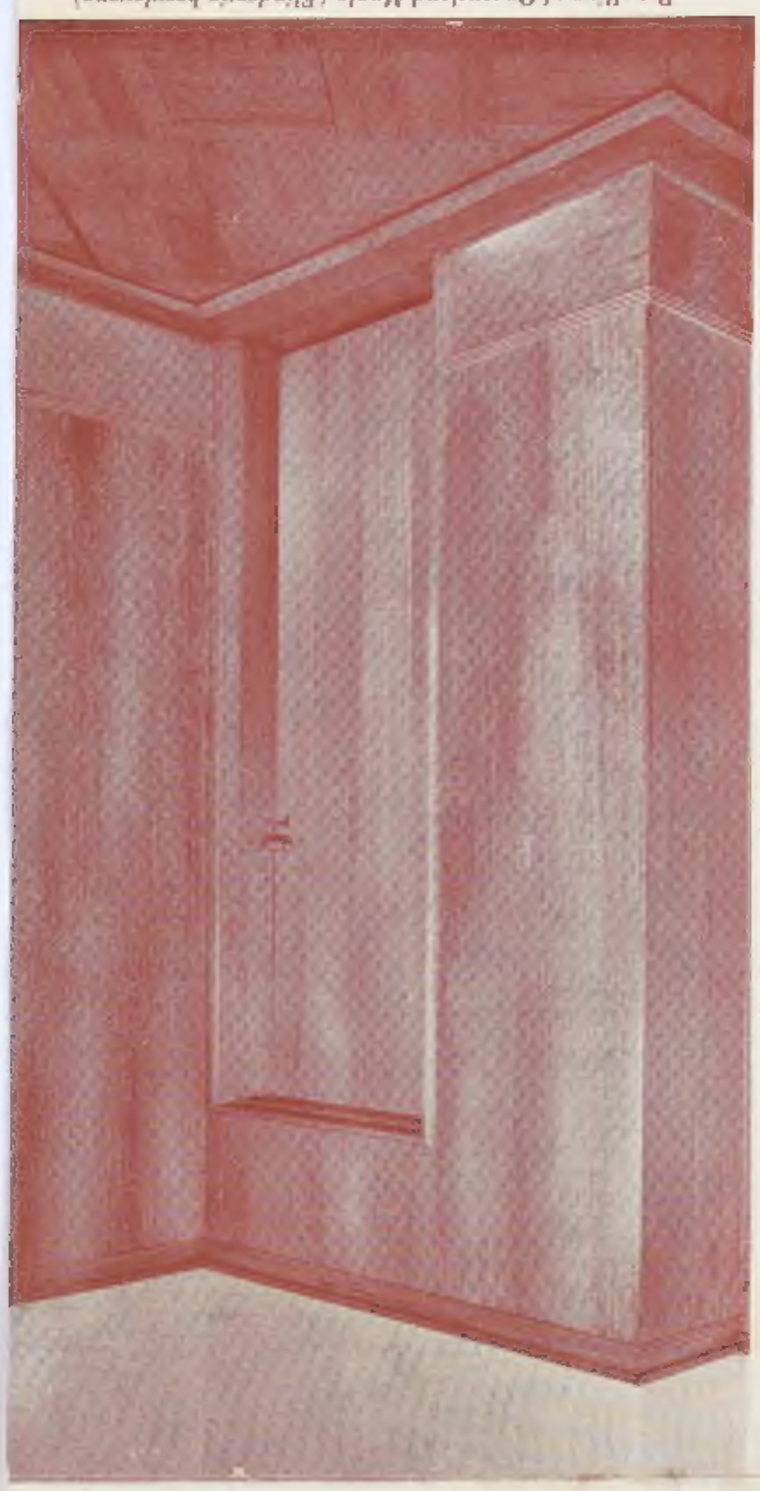
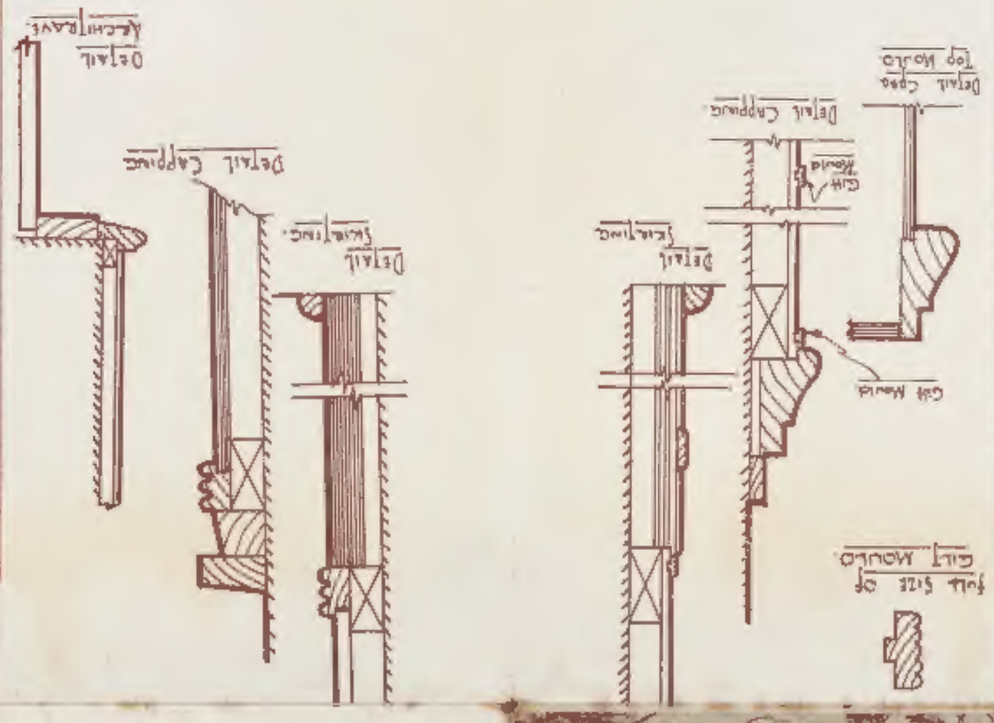
Panelling of Queensland Walnut (Endiandra palmerstoni). Pilaster and skirting of Queensland Maple (Flindersia brayleyana).



Panelling of Queensland Maple (Flindersia brayleyana): bleached according to the formula given at left.

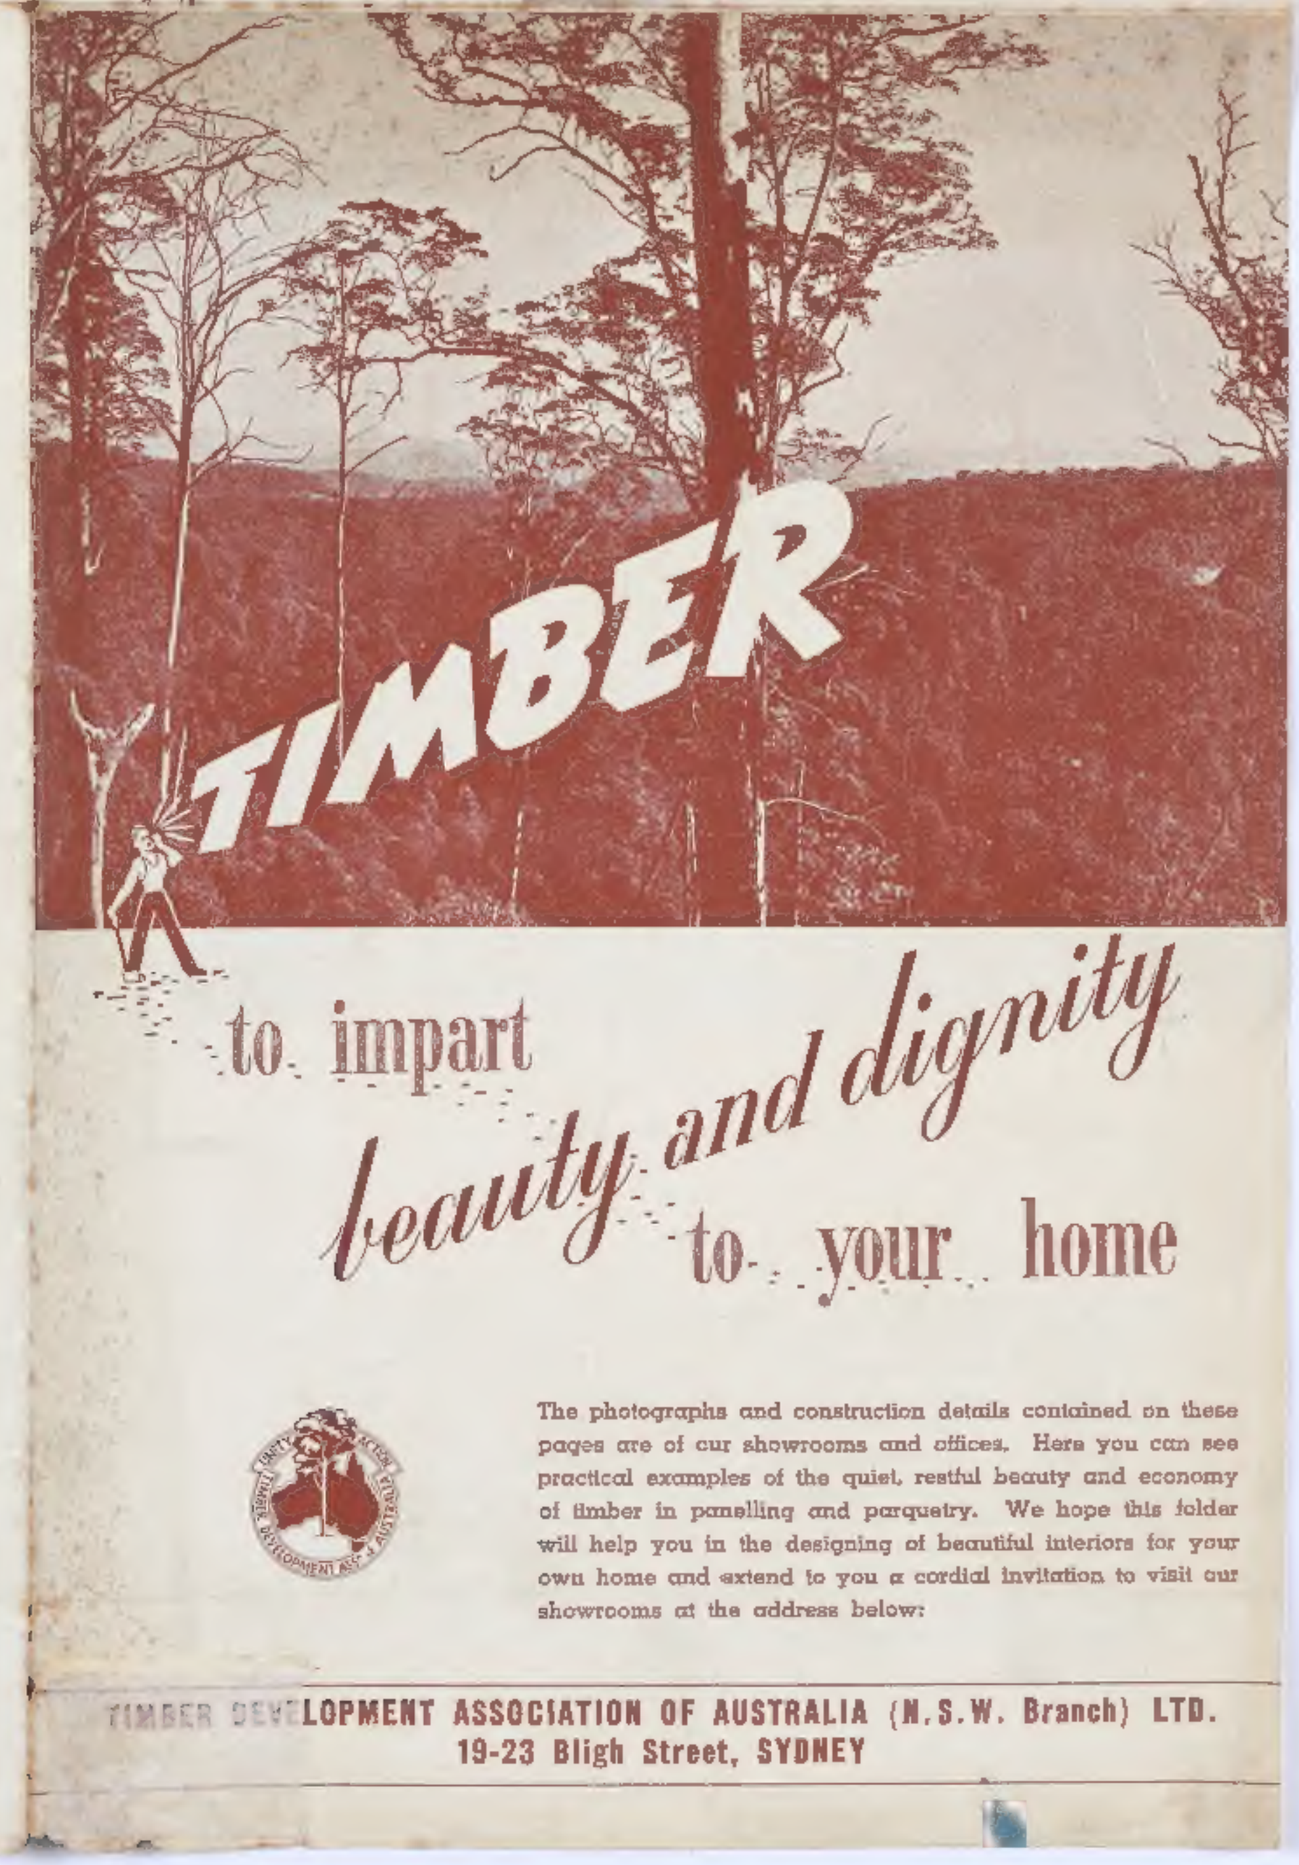


Construction Details of Panelling shown in illustrations on this page.

Plywood panels, ¼in. thick and jointed by a bevel joint of about 45 degrees, are glued and fixed with panel pins on to "ground" battens 2in. x 1in. The vertical (18in. centres) and cross (12in. centres) members of the "ground" are mortised and tenoned or, in some places, jointed by corrugated fasteners. The "ground" is attached to the wall perfectly level and plumb in all respects so as to obtain a proper basis for fixing the plywood. There are air grooves in all cross members, also at the top and bottom of the panelling, to enable the air to move about behind the panel.

Bleaching formula for Queensland Maple.

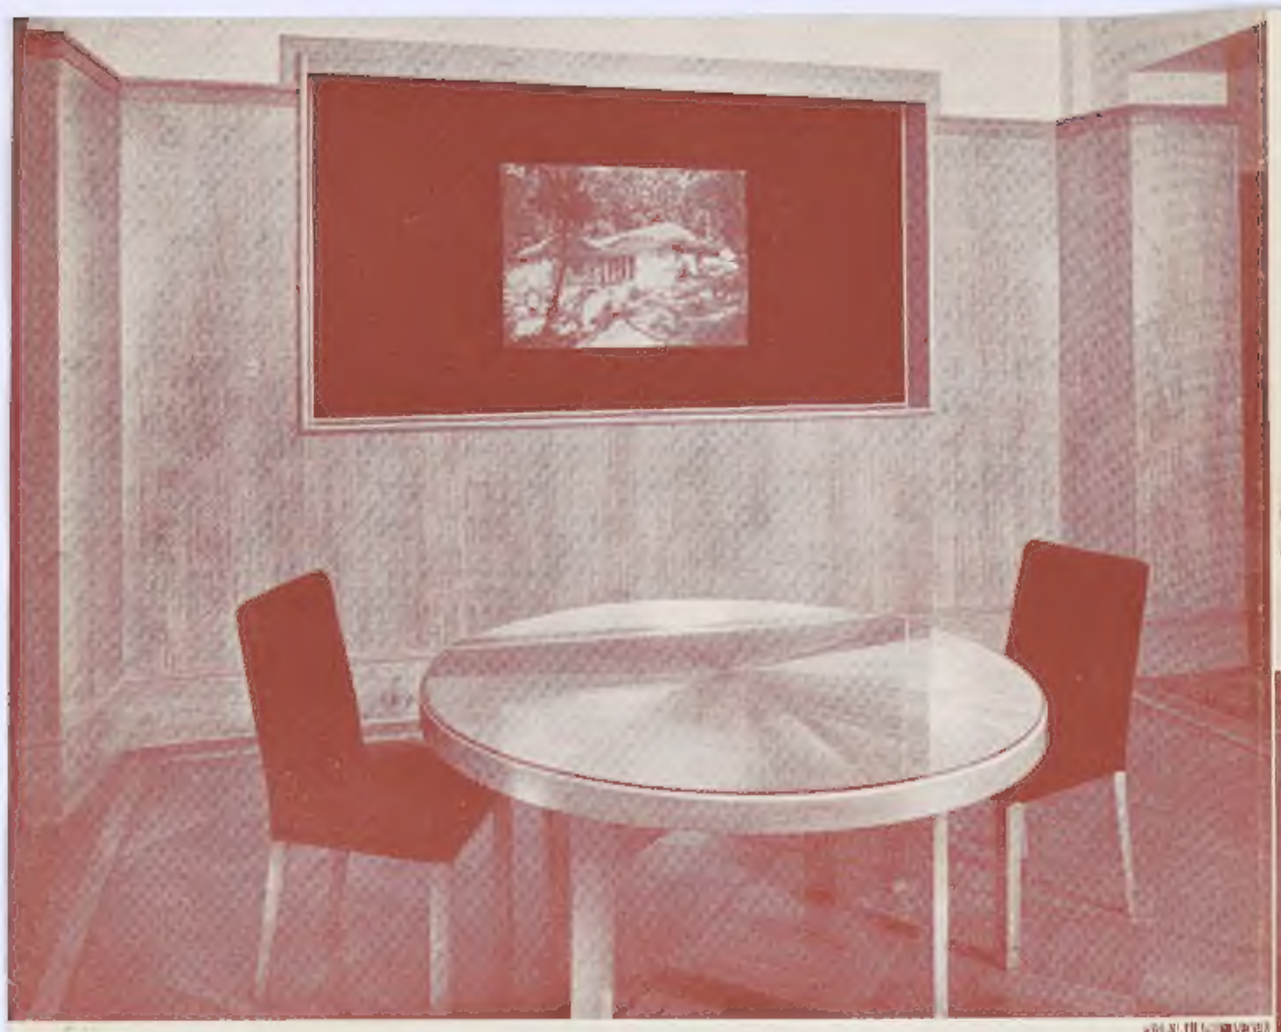
Dilute 100% Ammonia with equal parts of water and apply to the surface of the timber by flooding on with a cloth. While still wet, apply in a similar manner 100% Peroxide. The operator must wear rubber gloves while carrying out this operation. The operator should work with the grain of the timber and never under any circumstances must he work across the grain or in a circular motion. Allow to stand for twenty-four hours and then lightly paper with No. O glass paper. No filler of any kind should be used. Finish off with white polish.



to impart *beauty and dignity* to your home

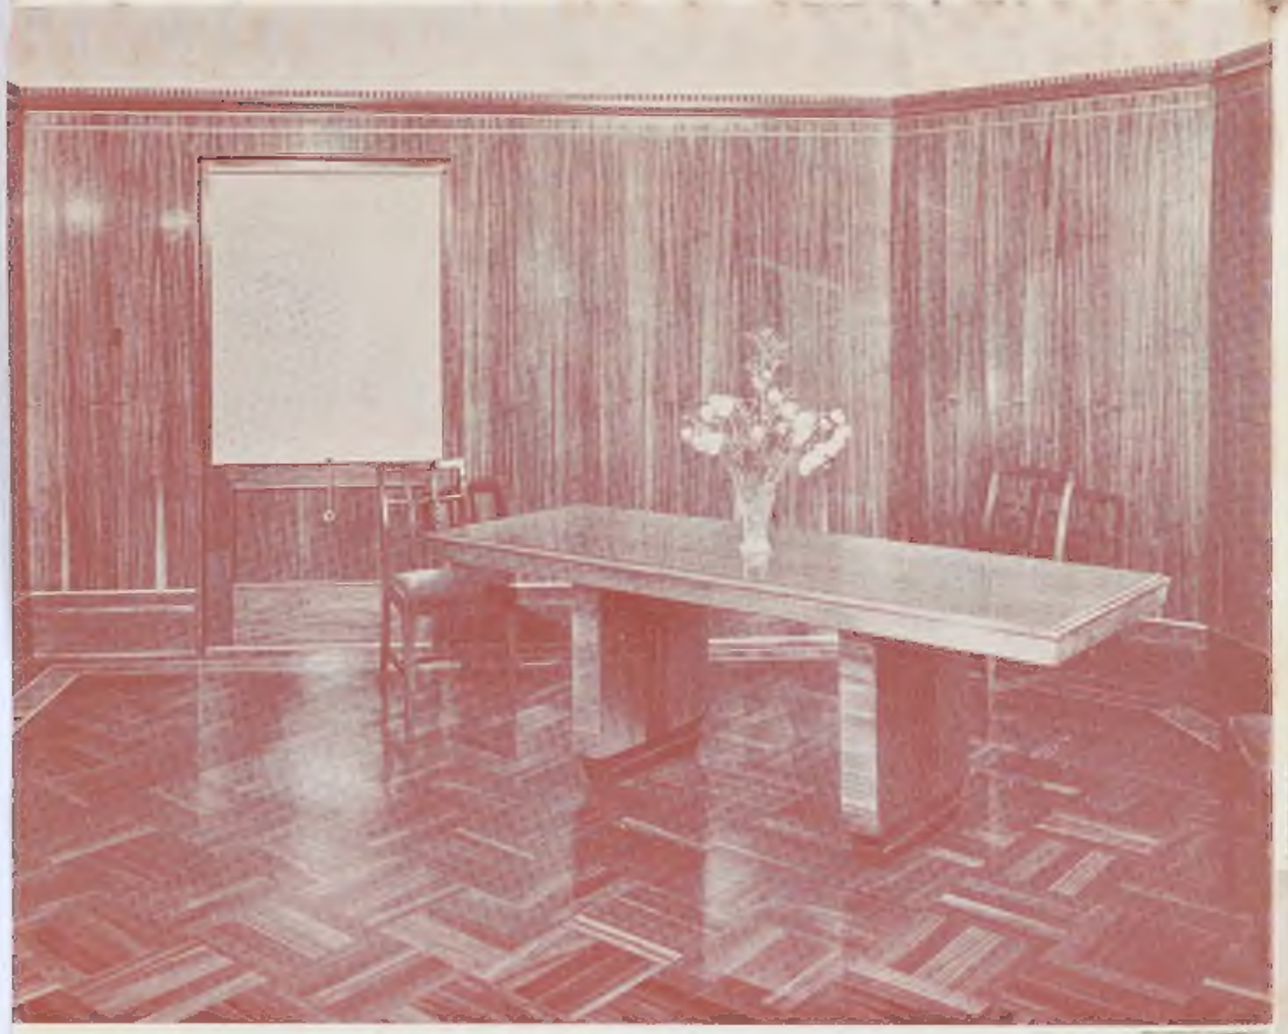
The photographs and construction details contained on these pages are of our showrooms and offices. Here you can see practical examples of the quiet, restful beauty and economy of timber in panelling and parquetry. We hope this folder will help you in the designing of beautiful interiors for your own home and extend to you a cordial invitation to visit our showrooms at the address below:

TIMBER DEVELOPMENT ASSOCIATION OF AUSTRALIA (N.S.W. Branch) LTD.
19-23 Bligh Street, SYDNEY



Panelling in photograph on the left is of Bleached Maple (Flindersia brayleyana). The table and chairs are of Silver Ash (Flindersia sp.), the table top being finished in Silver Ash veneer. The chairs are covered with blue leather. Parquetry is of Grey Satinash (Eugenia gustavioides) with diagonal strips of Blackwood (Acacia melanoxylon). Border of Australian Oak (Eucalyptus sp.) and Blackwood.

The panelling in the foreground of the photograph on the right is of Queensland Walnut (Endiandra palmerstoni) with skirting of Queensland Maple (Flindersia brayleyana). Light panelling in the centre room is of Bleached Queensland Maple, the table of Silver Ash (Flindersia sp.). The counter in the background has a top of Silver Ash and a front of ¼in. plywood faced with veneer of Bleached Queensland Maple. Parquetry in the foreground is of Queensland Walnut with a border of Queensland Maple and Crow's Ash (Flindersia australis). The entrance to the centre room has parquetry of Blackwood (Acacia melanoxylon), whereas Grey Satinash (Eugenia gustavioides) has been used for the parquetry in the centre room with diagonal strips of Blackwood.



The panelling, furniture and parquetry illustrated on the left is of Queensland Walnut (Endiandra palmerstoni), the latter with a border of Queensland Maple (Flindersia brayleyana) and Crow's Ash (Flindersia australis). Note the gilt horizontal moulds top and bottom of panelling. The skirting is of Queensland Maple.

The counter in the photograph on the right has a top of Silver Ash (Flindersia sp.) and a front of plywood faced with veneer of Bleached Queensland Maple (Flindersia brayleyana). The sections of siding (weatherboarding) are in White Cypress Pine (Callitris glauca), Sydney Blue Gum (Eucalyptus saligna), Blackbutt (Eucalyptus pilularis) and Tallowwood (Eucalyptus microcorys). Sections of panelling in Coachwood (Ceratopetalum apetalum), Southern Silky Oak (Grevillea robusta), and other various woods already mentioned. A feature creating great interest is the lining of 6½in. wide White Cypress Pine boards fixed vertically with cover strips of the same timber. Parquetry is of Jarrah (Eucalyptus marginata) with squares of Australian Oak (Eucalyptus sp.). Strip flooring is of Coachwood and Jarrah.
